 [Read Online](#)

Description : It is a book which fits all SAT Math you'll ever need. It has 12 full-length practice tests for the new SAT Math Tests.

About the Author I am a math teacher in Los Angeles. I designed notes which simplify and outline the concepts and skills in the course textbooks. I wrote this book following the same pattern of the math books used in the schools in Asia. This pattern has been proved as excellent for student-learning.
