Description : The only one book you need to prepare for the NEW SAT Math, launched in March 2016! This book provides over 1500 practice problems, one diagnostic test, and 10 mock tests. The problems and techniques in this book will help train and prepare students for the redesigned math section of the new SAT.

The breakdown of topics in this book reflects the topics emphasized on the new SAT. Working on the problem solving skills sections will help you build a strong sense of intuition for solving problems and making educated guesses. Within each concept section, the problems are grouped into three difficulty levels:

Easy, Medium, Hard. The critical thinking advices, answers, and detailed explanations are located to the right of the problems. You can refer to the answers easily but can also cover the page if you want to attempt the problem on your own. In addition to a thorough overview of materials, the over 1500 practice problems reinforce your understanding of the material and pinpoint the weak areas you need to improve on. The ten SAT Math mock tests located at the back of book closely mimic the actual exam and provide more even practice. By taking these mock exams with a timer under test-like conditions, you will be even more prepared to master the real test.

About the Author Dr. Simon Jang and Mrs. Tiffany Jang have been teaching in public high schools and in their own private tutoring studio more than 10 years. They have developed a unique and proven SAT Math learning system that suits the students needs and helps them efficiently prepare for the Math section of the SAT. Over the years, their innovative methods and effective teaching materials have benefitted not only their students scores, but also their students endeavors in college and beyond. Dr. Jang received a Ph.D in Chemical Engineering from New York Polytechnic University. He worked as a software developer before he became a high school teacher. He has been teaching math, physics and chemistry in New Jersey public high schools for many years. He has dedicated his spare time to developing innovative and effective methods of teaching high school math, chemistry, and physics in his established tutoring studio. Tiffany Jang earned a Masters degree in Library and Information Sciences from the University of Wisconsin-Madison and a Masters degree in Computer Science from the New Jersey Institute of Technology. After several years of teaching high school math, now she is working as a school librarian in the New Jersey public school system. They have spent years developing innovative teaching methods and effective learning materials. Their methods can both introduce a new student to the subject and remedy a students weaknesses to help them efficiently prepare for the SAT Math exam.
