Description : A revelation of Hawaiian National birth rights and Hawaiian National "inalienable" rights as protected by the "common-law" of their own lawful Constitution as a sovereign Nation, under God. Reveals how the U.S. Government unlawfully changes children's birth names to convert them to a second-class U.S.citizenship in violation of International law. The distinguishing feature as to identity difference is the way the birth name is modified into a fiction name of the federal jurisdiction to take away inalienable rights guaranteed by natural birth to Hawaiian National soil.
