The new SAT is challenging but it can be mastered through hard work, analytical thought, and by training yourself to think like an SAT test writer. Many of the exercises in this book are designed to prompt you to think like an SAT test writer. For example, in the math section, you will find Duals. These are pairs of similar SAT problems in which only one property is different. They illustrate the process of creating SAT questions. Features: Math: Twenty-six chapters provide comprehensive review of SAT math, including the new concepts from Algebra II and Trigonometry.
